

TRI-STATE PAINTING LLC

## ***Grand Ave Swing Bridge Rehabilitation, New Haven CT 2023 ABC CT, Excellence in Construction Award***

Tri-State Painting, LLC (TSI) was recently honored with the Excellence in Construction award for the historic Grand Ave Swing Bridge project under Mohawk Northeast Inc. ( The Excellence in Construction® Awards celebration honors the nation's most innovative and high-quality construction projects and world-class safety, inclusion, diversity and merit programs.) Originally built in 1896, the bridge is a rim-bearing swing bridge, which carries traffic over the Quinnipiac River. This bridge rehabilitation project has extended the structure's overall service life by 20 years and will significantly reduce the City's annual maintenance costs.

TSI provided the full surface preparation and painting services for the rehabilitation of the historic Grand Avenue Bridge, a moveable swing span that first opened in 1898 and crosses the Quinnipiac River in New Haven, CT. TSI also provided the Staging and Containment on this massive structure to allow proper access to every part of the bridge, this included the bridge mechanics, the operators house, and the steel bridge substructure.

This was a large-scale project that required working from barges, so the safety of the crew and environment was of the utmost importance. Bryan Romano was the Project Supervisor for TSI, his knowledge and ability to lead his team ensured the success of this historic project safely and efficiently.
