STATEMENT OF SAFETY POLICY

It is the policy of Tri-State Painting, LLC., to strive for the highest safety standards on our projects. Safety does not occur by chance. It is the result of careful attention to all company operations by those who are directly and indirectly involved. Employees at all levels must work diligently to execute the company's policy of maintaining occupational safety and health.

Our safety program is designed to preserve one of the most important assets we have, YOU. We will comply with the standards of all applicable regulatory agencies. It is the obligation of each employee to use safe work practices and to insist that all other employees on the job do likewise.

A primary responsibility of all levels of our organization is regard for the safety of the public, our customers, our own employees and the employees of our subcontractors. Our intent is to prevent any human suffering. Accidents, even minor ones, cause pain, both physical and mental. Prevention of injury and illness is a goal worthy of our best efforts.

A safe operation is organized, clean and efficient. If we view safety in the same way, we consider all other aspects of our operations, we will be in a better position not only to control accidents, but also to improve the total performance of our Company. It is, therefore, of utmost importance that all aspects of our safety program be strictly adhered to and that the intent of this program be followed to the letter. Any recommendations to improve our safety program are encouraged.

Safety must be a daily concern of each person, along with productivity, quality, cost control, morale, etc. Circumstances will sometimes require a decision on which of these factors have priorities. When such decisions must be made, in which case, **SAFETY IS FIRST**. Management expresses its desire to abide by all safety regulations of the state, federal and local governments.
